Does Your Thinking Limit Your Success?

Productive Learning - Live an Extraordinary Life

We all have within us the innate ability to create and live the life we truly want . . . IF that ability is developed and nurtured. And if you are like most people, you have formed habits and ways of thinking that are in direct conflict with what you want. Today's presenter, Lindon Crow, is committed to assisting people in uncovering and addressing this thinking and behavior, which opens the door to maximizing potential.

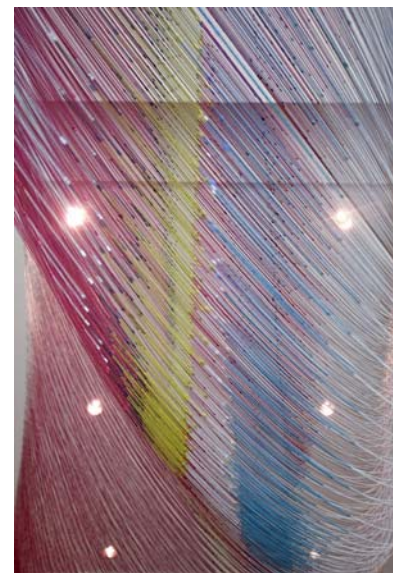

Lindon Crow is the President and a trainer for Productive Learning, a unique personal growth company that for over 20 years has been helping clients to develop their innate ability to create and live the life they really want.

Lindon's official entry into Productive Learning started in 2010 but personal growth and self-awareness have been sprinkled throughout his life through guidance and support from his father who is the founder and senior trainer of Productive Learning. His educational background in Psychology and Religious Studies aids him on his quest to fully understand himself and what drives all of us as individuals. Lindon believes that the right choice is always present to us; the problem is many times it is clouded with false beliefs and unjustified assumptions. His personal goal is to become fully aware of these beliefs and thus make the choices that lead him to an extraordinary life.
