

Corodata Tour and MER Webinar

Join us for a short tour of the new Corodata Records Management Facility in Escondido then a viewing of a MER webinar, **Content in Context**. The MER conference is recognized as the best single resource for understanding the many issues associated with life-cycle management of electronically stored information and acquiring the information needed to successfully achieve information governance with an emphasis from three perspectives: legal, technical and operational.

The webinar will discuss the 'yesterday' approach of managing and cleaning up information by its source that has resulted in an uncomfortably high percentage of EDRM implementations failings. We will learn how this major EDRM problem is solved—with a new content-in-context 'process' dimension that meets "tomorrow's" needs by replacing disjointed paper and paper-based methods with efficient, connected processes.
